

Course Code: CL-1000	Course: Introduction to Information and Communication Technology (IICT)
Instructor(s):	Yumna Asif

### Task 1: Basic HTML Boilerplate

1. **Create a New HTML File:**
    - In **VS Code**, create a new file called `index.html`.
  2. **Set Up the Basic Structure:**
    - Type `!` and press `Tab` to automatically generate the HTML boilerplate.
- 

### Task 2: Adding Text Elements and Headings

1. **Add a Main Heading:**
    - Inside the `<body>` section of your `index.html` file, add a heading (H1) with the text:
      - **"Welcome to My Web Page"**
  2. **Add a Paragraph:**
    - Below the heading, introduce yourself with a paragraph saying:
      - **"Hello! My name is [Your Name]. This is my first HTML web page."**
  3. **Add Headings H2-H6:**
    - Next, add six headings with the following texts:
      - **H2: "About Me"**
      - **H3: "Hobbies"**
      - **H4: "Favorite Foods"**
      - **H5: "Travel"**
      - **H6: "Contact Information"**
- 

### Task 3: Emphasis and Styling

1. **Add a Paragraph with Emphasis:**
    - Below your previous content, add another paragraph that says:
      - **"I am learning HTML and really enjoying it so far!"**
    - The word "really" should be emphasized using the `<em>` tag.
  2. **Style the Emphasized Text:**
    - Change the color of the emphasized word ("really") to **blue**.
-

## Task 4: Adding an Image

### 1. Find and Insert an Image before H1:

- Insert an image with the following specifications:
    - **Width:** 200px
    - **Float:** right
    - **Source:** Use can use any image you want.
    - **Alt Text:** Describe the image briefly (e.g., "Placeholder Image").
- 

## Task 5: Hyperlinks to Another HTML File

### 1. Create a New HTML File:

- In **VS Code**, create a second file called about.html.

### 2. Set Up the about.html Structure:

- In the about.html file, create a basic HTML structure (boilerplate) using the ! and Tab command, and title the page: "**About Me**".

### 3. Add a Main Heading and Paragraph:

- Add a heading (H1) that says: "**About Me**".
- Below the heading, write a paragraph introducing yourself and what you're learning in HTML.

### 4. Link to the about.html Page:

- Go back to the index.html file.
- Add a hyperlink that says: "**Learn more about me**".
- The link should direct to your about.html page.
